## MORE OPTIONS, SAFER RESULTS

PepperBall Systems are powered by high-pressure air to launch frangible plastic balls, which break upon impact and release an extremely effective super-irritant. These systems are contact safe, target accurate within 25 meters, and provide area saturation with PAVA within a few meters range.

## WHY PEPPERBALL SYSTEMS WORK:

PepperBall systems use Chemnetics technology to deliver a three-pronged, less-lethal response. Specifically, the following effects are combined to effectively achieve suspect compliance.

- Psychological shock – the surprise from being 'shot'
- Kinetic impact – PepperBall systems hit with 8-12 foot-pounds of force to stop subjects without causing permanent damage or serious injury.
- Chemical super-irritant – PAVA (capsaicin II) pepper powder causes coughing and burning / sensations in the eyes, nose, throat and skin.

## SEMI-AUTOMATIC 8 SHOT MAGAZINE FED PISTOL

The PepperBall TAC-8 SG semi-automatic pistol is a rugged, non-lethal, short-arm pistol. Firing the full range of the PepperBall munitions which includes Red PAVA PepperBalls, Green Dye marker balls, Purple Inert powder, training balls and Water balls via its eight shot magazine. ## HOT SHOT LAUNCHER

The Hot-Shot Launcher is a powerful, safe and compact personal defense product. It blasts about 5 grams of hot pepper powder on to your attacker. It is one of the only products that creates an instant barrier between you and your attacker. It can be easily concealed in your pocket or handbag. It is compact and portable and the pepper cloud irritates the attacker's eyes, nose and lungs, causing temporary incapacitation. It is ambidextrous and easy to use with quick reloads. The weapon has a target range of up to 12 feet. (Not recommended for less than arms length).
